

## JOB DESCRIPTION – STRUCTURAL MANAGER/ENGINEER

A potential candidate will be responsible for the marketing, strategic planning, recruitment, and management of TEG's structural design practice within the Transportation Group. This position will also support, design, review, and consult for the Construction Management and Municipal departments. This position provides the opportunity to lead and build the structural business practice while acting in a key role within the company.

Key responsibilities include business development initiatives as well as:

- Making organized and strategic client and teaming contacts
- Leading reconnaissance efforts and proposal writing for project pursuits
- Serving on professional committees
- Leading and providing structural engineering design services
- Providing support to project teams

The Structural Manager/Engineer will work along-side other discipline managers in developing and accomplishing the goals of TEG. This position requires a dynamic and professional leader who is able to further develop established client relationships as well as forge new relationships with support from the TEG executive team.

### **Desired Skills and Experience**

- Bachelor's Degree in Engineering at an ABET accredited school
- Professional Engineer-IL and Structural Engineer-IL licensure
- Experience with Illinois Department of Transportation and Illinois Tollway
- Valid U.S. driver's license

### **Apply**

Please send an updated resume and cover letter to [angelicag@thomas-engineering.com](mailto:angelicag@thomas-engineering.com) with the subject line "Structural Manager/Engineer Applicant".
