

Job Description – Municipal Engineer

Position Responsibilities

A potential candidate will be expected to be able to work independently or within small teams performing design and/or construction engineering services for a wide variety of municipal projects. The successful applicant should be a motivated, self-starting individual that aspires to work in a team environment and to ultimately grow and mature into a project management role.

Desired Skills and Experience

- Bachelor's Degree in Engineering at an ABET accredited school
- 3-5+ years engineering experience
- Design, plan review, and construction inspection of engineering plans
- Planning, design, and management of projects
- Preparation of cost estimates, plans, specifications, proposals, and contracts
- Ability to read and interpret engineering plans and verify items through field observations.
- Assist with survey layout and survey checks by performed horizontal and vertical field checks with total station, GPS, or transit level
- Visit and safely traverse construction and project sites while complying with all applicable safety codes and requirements
- Experience with Microsoft Office (Word, Excel, Access, PowerPoint, Outlook), Adobe Acrobat and Microstation (preferred CAD software) or AutoCAD, ESRI a plus.
- Available to work occasional evenings, nights, and weekends when required
- Perform all other duties as assigned by Project Manager(s) or TEG Executive Staff
- Valid U.S. driver's license
